DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 12, 14-16, 22, and 24-38 have been considered but are moot in view of the personal interview conducted on 9/11/2008 and the proposal by Applicant to amend claims 12 and 22 to overcome the art rejection of the previous Office Action.

Priority

2. Submission of English translation of priority document (KR 2001-10842, filed 3/2/2001) is acknowledged.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Randall Svihla on 9/12/2008.

The application has been amended as follows:

In the claims:

In claim 12, line 8, delete "on both sidewall" after "and" and insert -- directly contacting both sidewall --

In claim 22, line 8, delete "on" after "and" and insert -- directly contacting both --

Allowable Subject Matter

Art Unit: 2893

4. Claims 12, 14-16, 22, and 24-38 are allowed.

5. The following is an examiner's statement of reasons for allowance: The combined references of Takemura et al. (USPN 5,962,897) and Yamazaki et al. (USPN 6,617,648), closely related references, disclose a thin film transistor (TFT), comprising: a substrate; a semiconductor layer formed over said substrate having end portions; a first insulating layer disposed on said semiconductor layer so as to expose ones of the end portions of said semiconductor layer; a gate electrode formed over said first insulating layer; a capping layer formed over said gate electrode; spacers formed over said first insulating layer and on both sidewall portions of said gate electrode and said capping layer. However, amended claims 12 and 22 require that spacers be formed over said first insulating layer and directly contacting both sidewall portions of said gate electrode and said capping layer. The above limitations in combination with other claim limitations are not taught or fairly suggested by the prior art nor would it be obvious to modify the references of record so as to yield the device of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Sefer whose telephone number is (571)272-1921.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Davienne Monbleau can be reached on (571) 272-1945.
